

New Request for Assistance (RFA)

I am pleased to provide you with the 14th edition of *Global Change Research News*. This edition announces the release of a new Request for Assistance (RFA) entitled, “Assessing the Consequences of Interactions Between Human Activities and a Changing Climate.” This RFA was developed through a partnership between the ORD “Science to Achieve Results” (STAR) Program and the Global Change Research Program. Although the STAR Program has been supporting socioeconomic research through an ongoing series of solicitations, this RFA represents a new emphasis on “human dimensions” research in the Global Change Research Program.

A copy of the RFA is attached as a WordPerfect file. It also can be found on the internet at: <http://es.epa.gov/ncercqa/rfa/00humanrfa.html>.
